

Proactive care, whenever it's needed

The RocheDiabetes RemoteCare solution is an integrated, intuitive and secure tool which helps healthcare professionals provide efficient, personalized diabetes care when and where it is needed.

*Not real doctor or patient.

At a glance

The RocheDiabetes RemoteCare solution is **an all-in-one tool** for **personal diabetes care at a distance**, which makes it possible to:

- › **Visualize** patient data and **connect** to multiple devices, apps and solutions (through the RocheDiabetes Care Platform)
- › **Evaluate** patient status and **prioritize** based on trend history available in Patient Management view
- › **Track, analyze** and **act** on glycemc patterns
- › **Display indicators** help to identify patients that deviate away from personalized pattern configurations
- › **Communicate easily** and securely with patients through the integrated **online chat**, if necessary
- › **Record and report** work done that can help **facilitate reimbursement** when available

What are the key benefits of the RocheDiabetes RemoteCare solution?

Enabling you to meet individual care needs, wherever the patient is

Get a comprehensive picture of how people with diabetes are doing between visits and receive automatic notifications when intervention may be necessary, thanks to the RocheDiabetes RemoteCare solution

Providing more frequent contact to facilitate engagement

Create a two-way dialog with people with diabetes using the RocheDiabetes RemoteCare solution, which makes it possible to share current diabetes information and aim for improved therapy engagement

Offering the reassurance of secure data management

Be certain that the data of healthcare institutions and their patients are protected with the strict measures and controls incorporated in the RocheDiabetes RemoteCare solution, providing peace of mind on privacy to all users

Co-created with healthcare professionals, the RocheDiabetes RemoteCare solution can help you manage your time better and support people with diabetes to feel more secure and connected, and enable them to take greater control of their condition.

Proactive care, whenever it's needed
