

Create new patient

Step One: Create New Patient

Once you have logged into your account, as an HCP, you can add new patients easily.

Click on **Create New Patient Tab** to continue.

Step Two: Select Profile

Select the desired profile(s) by marking the corresponding radio button below the appropriate profile(s) - you may only have one option available.

Click **Next** to continue.

Step Three: Fill in Patient Info

Fill in personal data.

Required fields:

- Name
- Surname
- E-mail (for patient access)

Step Four: Health Info

Fill in health information.

Required fields:

- Diabetes Type
- Associated Professional
- Gender
- Pregnancy (if Female)

Click **Next** to confirm and create a new client profile.
